Uranium City Resources (“UCR”) is pleased to provide a summary of exploration activities completed at the Company’s properties in the Uranium City region of Northern Saskatchewan, Canada.

September 30, 2005

TSXV:UCR

During the 2005 field season, UCR completed the following:

- (i) regional airborne (VTEM) geophysical survey
- (ii) diamond drilling at the Contact Lake and Fish Hook uranium projects
- (iii) extensive sampling, prospecting and mapping

The VTEM survey results are being used by UCR to outline geological features (conductors, lithological boundaries and structural features). Biogeochemical survey results are being used in parallel with geophysical results to help prioritise and confirm drilling targets.

UCR is currently evaluating and compiling results from the 2005 campaign. Samples collected were sent to the Saskatchewan Research Council and TSL Laboratories, (both in Saskatoon, SK) and Activation Laboratories (Ancaster, ON). These analytical laboratories are all accredited to ISO-17025.

The pending assay results of UCR will be released in a timely fashion.

The Qualified Person (QP) and Project Consulting Geologist for the summer 2005 exploration programs and the person who reviewed this press release is Mr. Kian A. Jensen, B.Sc., PGeo. (Ont).

About Uranium City Resources:

UCR is a Canadian uranium exploration company with 10 projects totaling 50,529 hectares which are located on the northwestern perimeter of the Athabasca Basin, in the Uranium City mining district, which produced uranium for over 30 years.

UCR began trading on the TSX-V in September 2005 and is actively involved in the exploration and development of 10 uranium projects. UCR has a cash position in excess of \$2 million (CDN).

ON BEHALF OF THE BOARD OF DIRECTORS OF URANIUM CITY RESOURCES INC.,

Bob Kasner, President & C.E.O.

Forward looking statements:

This news release contains certain forward-looking statements. These forward-looking statements are subject to a variety of risks and uncertainties beyond UCR's ability to control or predict, which could cause actual events or results to differ materially from those anticipated in such forward-looking statements. Although UCR believes that the assumptions inherent in the forward- looking statements are reasonable, undue reliance should not be placed on these forward-looking statements.
